

IS PROUD OF THE **CUSTOMER STORY**

PROJECT: TISAX® Consultancy
and Pentesting

TIME PERIOD: April 2022 - January
2023

TESTIMONIAL:

We have found a partner with 360DT who acts highly professionally and competently. 360DT is technically and professionally fit so that the measures and coordination with the specialist departments such as IT, data protection, QM, and management are always carried out on an equal footing. This enabled us to implement the project successfully and in a very target-oriented way.

**Alexander
Siegl**
CTO

We are a service provider in the automotive industry and decided to get involved with TISAX® at an early stage. 360DT will continue to be a strategic partner and companion for us so that we can consider the requirements of TISAX®, IT security, and ISO27001 in the orientation of our company. We also apply them in our daily business. We highly recommend them - 5 stars!

ABOUT THE CUSTOMER:

In 1935, an automotive expert was first mentioned by name in Kempten. Over 85 years later, a service provider with the core competencies of expert opinions, inspections, and safety has emerged from the beginnings of vehicle valuation. More than 150 employees now provide services in over 30 business areas at more than 10 locations.
